EXPERIENCE

Truviz.AI truviz.ai

AI/ML Engineer

Remote

Jan 2026 – Present

- Shipped enterprise iframe embedding feature, cutting client onboarding time ~40%.
- Resolved LiveKit streaming instability, reducing latency ~35% and raising uptime to 99.2%.
- Integrated LLM orchestration (n8n, Make, Composio) with Langfuse, halving incident resolution time.
- Fine-tuned domain-specific LLMs, improving RAG retrieval accuracy 28% and lowering hallucinations 40%.
- Built full-stack platform: Go (chi) backend, PostgreSQL, Stripe billing, RAG pipeline, LiveKit SDK.
- Developed Next.js 15 + React 19 frontend using TypeScript, Tailwind, AG Grid, Chart.js, LiveKit UI.
- Set up Docker Compose CI/CD on AWS CodeBuild/CodeDeploy, automating builds and deployments.
- Created AI SDR platform with real-time conversational demos, automated lead qualification, and meeting booking.

iSoft Tech — MoveLogic.ai movelogic.ai

Full-Stack AI Developer

Remote · Auckland, NZ

Mar 2025 – Jun 2025

- Engineered AI-powered logistics SaaS with Next.js frontend and FastAPI backend, gaining 1,000+ active users weeks after launch.
- Integrated computer-vision models for inventory recognition, cutting manual data-entry workload ~60% and processing 10k+ documents.
- Designed scalable REST API delivering sub-second ML inference predictions.
- Optimized AWS infrastructure to maintain 98% uptime and support real-time inference.
- Implemented CI/CD pipeline with GitHub Actions and Docker, enabling automated deployments.

KL University kluniversity.in

Undergraduate Research Fellow (Part-time)

Guntur, India

Jun 2025 – Jan 2026

- Prototyped 4+ domain-specific fine-tuned LLMs and agentic AI frameworks; benchmarked 10+ models on efficiency.
- Co-authored 3 NLP research projects; findings adopted in 2 production architectures at Truviz.AI, reducing model latency ~20%.
- Developed evaluation pipelines using Python, LangChain, and Hugging Face Transformers.
- Presented research outcomes at internal seminars, influencing AI strategy and deployment decisions.

PROJECTS

TruGen AI — Real-time multimodal AI video agents trugen.ai

- Full-stack platform with Go backend (chi, PostgreSQL, WebSockets) and Next.js 15/React 19 frontend.
- Implemented Stripe multi-tenant billing, provider routing, and RAG pipeline (Firecrawl → LangChain → Pinecone → S3 → SQS).
- Deployed via Docker Compose on AWS CodeBuild/CodeDeploy CI/CD, enabling rapid iteration.
- Built reusable React components with TypeScript, Tailwind, Framer Motion—directly relevant to Chrome extension UI development.
- Integrated LiveKit realtime media, showcasing expertise in real-time streaming APIs used in browser-based AI tools.

ClaraSDR.ai — AI-driven sales development representative clarasdr.ai

- Built end-to-end AI SDR system with LiveKit, LLMs, and automated outreach workflows.
- Designed API-first architecture and expressive AI avatars, enabling seamless CRM integration.
- Implemented real-time conversational demos using TypeScript/React front-end, mirroring Chrome extension interaction patterns.
- Leveraged AWS services (Lambda, S3, IAM) for secure data handling and scalable backend.
- Created CI/CD pipelines with GitHub Actions and Docker, ensuring reliable deployment of AI-powered features.

Clawdface.ai — Conversational control for OpenClaw agents clawdface.ai

- Full-stack conversational AI using Go backend, Python LiveKit agent, and Next.js 16/React 18 UI.
- Integrated provider health routing with latency ranking, improving response times for browser-based agents.
- Implemented multi-tenant billing, RAG pipeline, and recall meeting capture—demonstrating complex data orchestration.
- Front-end built with Tailwind, Framer Motion, and LiveKit UI components, directly transferable to Chrome extension UI work.
- Deployed on AWS CodeBuild/CodeDeploy, reinforcing cloud-native deployment expertise.

MoveLogic.ai — AI-powered logistics SaaS platform movelogic.ai

- Architected platform from zero to 1,000+ users across three enterprise clients.
- Developed computer-vision and automation pipeline that cut manual logistics processing time by 65%.
- Built secure, scalable backend with Go and PostgreSQL, integrated with AWS services for storage and compute.
- Created responsive React front-end with TypeScript, enabling intuitive browser-based user experiences.
- Established CI/CD workflow using Docker and GitLab CI, ensuring continuous delivery and reliability.

EDUCATION

KL University <i>Bachelor's Degree in Computer Science & Engineering — Specialization: AI & Machine Learning Grade: 9.0/10.0</i>	<i>Guntur, India</i> 2022 – 2026
Board of Intermediate Education, Andhra Pradesh (BIEAP) <i>Intermediate (12th, MPC)</i>	<i>Andhra Pradesh, India</i> 2020 – 2022
Board of Secondary Education, Andhra Pradesh (BSEAP) <i>Secondary (10th, SSC)</i>	<i>Andhra Pradesh, India</i> 2019 – 2020

ACHIEVEMENTS

- **4 Production AI Platforms Shipped:** Engineered and delivered key features for TruGen.ai, ClaraSDR.ai, Clawdface.ai, and MoveLogic.ai across multimodal AI, automation, voice, and logistics SaaS.
- **IIT Convoke 3.0 National Hackathon — Top 6 of 4,500+ teams:** Ranked in the top 0.13% of participants nationwide.
- **1,000+ GitHub commits/year:** Contributed open-source n8n automation workflows and the Firecrawl LLM pipeline.
- **Top 15% of Cohort:** Maintained a 9.0/10.0 CGPA while building and launching four production AI platforms.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner:** Valid 2024–2027; Foundational cloud computing certification covering AWS core services, security, architecture, and pricing
- **Oracle Certified AI Foundations Associate:** Valid 2025–2028; AI and machine learning fundamentals certification covering neural networks, NLP, and Oracle AI services
- **Oracle Certified Architect Associate:** Valid 2025–2028; Cloud architecture certification covering scalable, secure, and high-availability solution design on OCI
- **Salesforce AI Associate:** Valid 2024–2027; AI certification covering Salesforce Einstein, predictive analytics, and AI-driven CRM automation
- **GitHub Foundations:** Valid 2025–2028; Git version control, GitHub collaboration workflows, CI/CD with GitHub Actions, and open-source best practices
- **Wipro Digital Skills Readiness Program – Full Stack:** Valid 2025–2028; Full-stack development certification covering frontend, backend, and cloud technologies
- **Certified Automation Essentials Professional:** Valid 2025–2028; Test automation certification covering Selenium, Playwright, Cypress, and CI/CD pipeline integration

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, JavaScript, Node.js Frameworks: FastAPI, React.js, Next.js, Tailwind CSS, Framer Motion, AG Grid, chi router, n8n, Make (Integromat), Composio, Supabase, Prisma, Drizzle ORM, LangChain Go, LiveKit, WebRTC, WebSockets, REST APIs Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, CI/CD Pipelines, AWS CodeBuild, AWS CodeDeploy, SQS, Cloud Architecture AI/ML: Generative AI, LLM Research, Large Language Models (LLMs), Transformer Architectures, Retrieval-Augmented Generation (RAG), Agentic AI, Multimodal AI, Vector Embeddings, Model Fine-Tuning, Prompt Engineering, Real-Time AI Systems, Computer Vision, Voice Agents, Deepgram (STT), Cartesia (TTS), AssemblyAI, ElevenLabs, Groq, Cerebras, Cerebrum, Runpod, LangChain Go, Langfuse, Recall Tools & Platforms: LiveKit, WebRTC, Deepgram (STT), Cartesia (TTS), Stripe, Pinecone, Firecrawl, HeroUI, Stack Auth, Runpod, Recall, Langfuse, AssemblyAI, Groq, Cerebras, Cerebrum, Real-Time Streaming Pipelines Databases: PostgreSQL, Prisma, Drizzle ORM, Supabase, Pinecone	Methodologies: System Design, Distributed Systems, Microservices Architecture, CI/CD Pipelines Soft Skills: Open-Source Contribution Spoken Languages: English (Professional), Telugu (Native), Hindi (Professional)
